## **Ocean Power Technologies Announces PB3 Commercial PowerBuoy® Performance off Kozu-Island, Japan After Eight Weeks of Deployment**

**Pennington, NJ – June 12, 2017 – Ocean Power Technologies, Inc.** (NASDAQ: OPTT) (“OPT” or the “Company”) announced today that its PB3 commercial PowerBuoy®, which is deployed off Kozu-Island, Japan as part of a previously announced lease, is meeting all of its performance requirements. Closer to home, the commercial PB3 Power Take-Off (“PTO”) accelerated life testing, which is conducted at the Company’s headquarters in New Jersey, reached over 67 million strokes that simulates over 4 years of ocean operation.

George H. Kirby, President and Chief Executive Officer of OPT, stated “We are delighted to announce the excellent performance of our PB3 commercial PowerBuoy® since its deployment on the 17<sup>th</sup> of April this year, and to our full satisfaction. We believe this performance further validates the commercial maturity of our PB3 and demonstrates OPT’s ability to address applications in our target markets such as ocean observing, oil and gas, security and defense, and communications.”

Dr. Mike M. Mekhiche, OPT’s Executive Vice President of Engineering and Operations, stated, “ We believe the current performance of the PB3 off the coast of Japan is a strong affirmation of the maturity of the PowerBouy® and its ability to play an important role in the on-going digitization effort of the ocean, the oil and gas industry and other markets of interest. Since April 17<sup>th</sup>, the PB3 PowerBuoy has generated a total of over 471 kWh of electric power. It has achieved a single day-peak production of over 24 kWh.”

Dr. Mekhiche further stated, “The PTO accelerated life testing has continued reaching a cumulative number of strokes over the fleet of PTOs, of over 67 million, which simulates a cumulative ocean-operation-duration of over 4 years.”
